HERE!

## The Approach

Pain symptoms are caused by the disruption to cellular metabolism. Restoring cellular metabolism relieves pain and heals the root cause.

Hyper Metabolism  
Hypo Metabolism  
Normal Metabolism

- Musculo-Skeletal Pain
- Low Back Pain
- Cervical Spondylosis
- Arthritis Knees
- Peri-Arthritis Shoulder
- Neuro-Rehabilitation
- Stroke Rehabilitation
- Injury Healing
- Wound Healing
- Whole Body Regeneration

## BCR-Therapie

BCR-Therapie is a non-invasive, painless, and safe treatment method. It is based on the principle of metabolic therapy, which restores the cellular metabolism and thus relieves pain and promotes healing.

- Whole Body Regeneration

## The Theory Of Metabolic Therapy

Conventional therapy focuses on treating the symptoms only by analgesic and anti-inflammatory drugs. Even prolonged drug use leads to side effects and does not address the metabolic process. Metabolic therapy is a different approach and requires no side effects and no long-term treatment.

## The Approach

Pain symptoms are caused by the disruptions to cellular metabolism. Restoring cellular metabolism relieves pain and helps the body heal itself.
