

"BCR-Therapie system helps improve degenerative conditions and metabolic disorders."
Dr. Kampon Sriwatanakul, MD, PhD
 Professor Emeritus - Faculty of Science, Mahidol University, Thailand
 Regeneration Centre of Thailand

"Every Sports Center should have a BCR-Therapie system."
Dr. Edgar Micheal T. Eufemio, MD
 President, ASEAN Society for Sports Medicine and Arthroscopy

"I was introduced to BCR-Therapie system when we had just opened a Physiotherapy department in our 56-year-old family hospital. Our patients are happy with the good results on acute and chronic pain conditions.
 BCR-Therapie has become a premium part of our Physiotherapy Dept's standard protocol of treatments along with other equipment. Particularly notable is the usefulness of BCR-Therapie in treating Stroke patients. We were also impressed with the results on Spasticity in Stroke patients. Instead of giving Botox injection for the spasticity which is more expensive, BCR-Therapie is very effective. Also the Stimulation program is usually helpful for Stroke patients."
Dr. Dennis Lazaro, MD
 Co-owner and Anesthesiologist, Castro Maternity and General Hospital, Bulacan, Philippines

"The training I received in my former job as a flight stewardess taught me the importance of looks and personal grooming especially when it comes to putting the best face forward. Facial beauty regiments play a very important part in my life and I have gone for many different types of facials. When I learnt about the science behind BCR-Therapie treatments it just made good sense to me. I tried one session and immediately noticed and felt the difference. I made the commitment to buy the device and use it at home faithfully.
 Today my face looks nice and tight with a radiance and glow. It also makes my skin look fairer. Besides using it for facial muscles and wrinkles, I also use it for my neck and shoulder pain."
Ms Gina Chan, Ex-Flight Stewardess, Singapore Airlines

"I have been suffering from upper back shoulder pain caused by my desk bound computer job. This small BCR device is like a godsend for a busy executive like me to whom time is a premium. I can now have longer and more frequent sessions at the comfort of my office and home without impinging on productive hours. It helps to relieve my pain and stress within my body. I am happy with the BCR results."
Mr. Darren Liew, IT Professional, Singapore

THE SCIENCE OF CELLULAR METABOLIC THERAPY

For over 5,000 years, traditional Asian healers have known the human body's ability to self-heal. A disruption in energy flow needed to regulate cellular metabolism weakens this self-healing ability. This situation is often caused by injuries and infections. It then manifest as pain problems, physical disabilities and illnesses.

As illness begins at the cellular level, healing should also begin at the cellular level. Restoring cellular metabolism is the most effective and natural way to treat pain conditions, physical disabilities and illnesses.

BCR-Therapie embodies Asian wisdom with German innovation.

"I've been using BCR-Therapie devices in my medical practice for the past 15 years. I believe that in medical practices where the focus is to try drug and surgery-based solutions as the last resort, BCR-Therapie system will be a front-runner."

Priv.-Doz. Dr. med. habil. Rüdiger Schellenberg

Founder and President of the International Society of Medical Microcurrent Therapy, 2001

BCR-Therapie is a microcurrent-based Metabolic Therapy system that helps regulate disrupted cellular metabolism. Conventional treatment methods understand illnesses based on 'deviations from the norm' as seen in X-rays and laboratory tests, and treatments attempt to block or restore these deviations as quickly as possible.

The holistic approach in BCR-Therapie sees illnesses as disturbances in the body's regulatory mechanisms and therefore treats the cause of the complaint rather than the symptom.

BCR-Therapie uses cybernetic technology to process information from the body and tailors deliveries based on biological feedback.

Metabolic Therapy
in your own home or on the go.**

ABOUT US

BCR-Therapie is a patented treatment system developed in Germany. It began in 1999 with Dr. Gunther Schwab and Prof. Bernd Walitschek producing the Clinic-Master Professional, followed by Vital-Master, Power2Cell and Luxxamed. The current models are Power2Cell and Luxxamed. Power2Cell is a personal-use version and the Luxxamed is a complete hospital version.

The group of German scientists and researchers behind the production of the Power2Cell are the same pioneers of BCR-Therapie since 1999. The Power2Cell model is fully designed and manufactured in Germany.

In Asia, BCR-Therapie devices were first introduced in Singapore in 2006. The Singapore office still continues distributing BCR-Therapie devices throughout the Asian region.

Cellular metabolic disorder is a cause or effect for all ailments.
What can the POWER2CELL do for you?
